SECTION - B
(Language Component)

IV. **Read the following passage and answer the questions that follow:** (5)

Today's woman is a highly self-directed person, alive to the sense of her dignity and the importance of her functions in the private domestic domain and the public domain of the world of work. Women are rational in approach, careful in handling situations and want to do things as best as possible. The Fourth World Conference of Women held in Beijing on World Summit for Social Development which also emphasized on the pivotal role of women in eradicating poverty and mending the social fabric.

The Constitution of India has conferred on women equal rights and opportunities - political, social, educational and of employment. Because of oppressive traditions, superstitions, exploitation and corruption, a majority of women are not allowed to enjoy the rights and opportunities, bestowed on them. One of the major reasons for this state of affairs is the lack of literacy and awareness among women. Education is the main instrument through which we can narrow down the prevailing inequality and accelerate the process of economic and political change in the status of women.

The role of women in a society is very important. Women's education is the key to a better life in the future. A recent World Bank study says that 'educating girls is not a charity, it is good economics and if developing nations are to eradicate poverty, they must educate the girls. The report says that the economic and social returns on investment in education of the girls' considerably affects the human development index of the nation. Society would progress only if the status of women is respected. The presence of an educated woman would ensure education of the family. Education and empowerment of women are closely related.

Women's education has not received due care and attention from the planners and policy makers. The National Commission for Women has rightly pointed out that even after so many years of independence, women continue to be treated as the single largest group of backward citizens of India. The role of women in overall development has neither been fully understood nor has it been given its due in the struggle to eliminate poverty, hunger, injustice and inequality at the national level. Even when we are living in the 21st Century, our society still discriminates against women in matters of their rights, privileges and prevents them from participating in the process of national and societal progress. Various committees and commissions have been constituted before and after the independence to evaluate the progress in women's education and to suggest ways to enhance the status of women.

1. Education is the main instrument that helps in _____.
   a) Creating awareness among women.
   b) Narrowing down the prevailing inequality.
   c) Accelerating the process of economic and political change in the status of women.
   d) All the above.
